# CERTIFIED PRODUCT MANAGEMENT (CPM)

CPM is the leading maintenance management program for industrial hose assemblies.

## THE BENEFITS OF CPM

- Reconised testing & assembly procedures
- Improved Health & Safety compliance
- Utilisation of latest technology and products
- Reduction in plant downtime
- Environmentally beneficial through reduced product failure
- Maximise hose lifecycle by measuring performance
- Easily implemented and managed by MFS
- 'Live' information giving an immediate status of any hose assembly

## HOW DO YOU GET CPM?

### With 6 easy steps:

- Initial consultation
- Site survey
- Recommendations
- Product identification
- Data upload to EXARO™ Register
- Programmed maintenance begins

# EXARO™ HOSE MAINTENANCE PROGRAM

## WHAT IS EXARO™?

EXARO™ is a unique asset management product that has been developed to enhance the lifecycle of your industrial hoses.

This web-based program has become the mainstay for hose management with industries including food & beverage, petroleum & chemical, maritime and engineering.

EXARO™ presents you the customer with immediate and accurate visual information on the status of your hose assets, and is designed as an integrated part of the MFS CPM program.

## FEATURES OF EXARO™

### Web based

- Accessible anywhere, anytime

### Secure

- Password protected

### Interactive

- View registers and sort by category
- Print test certificates and reports
- View failed hose certificates
- View audit reports
- View historical data to improve performance

### Flexible

- You choose the features you want
- Attach site standards, documents, drawings

### Cost Savings

- Trend hose performance to assist budgeting

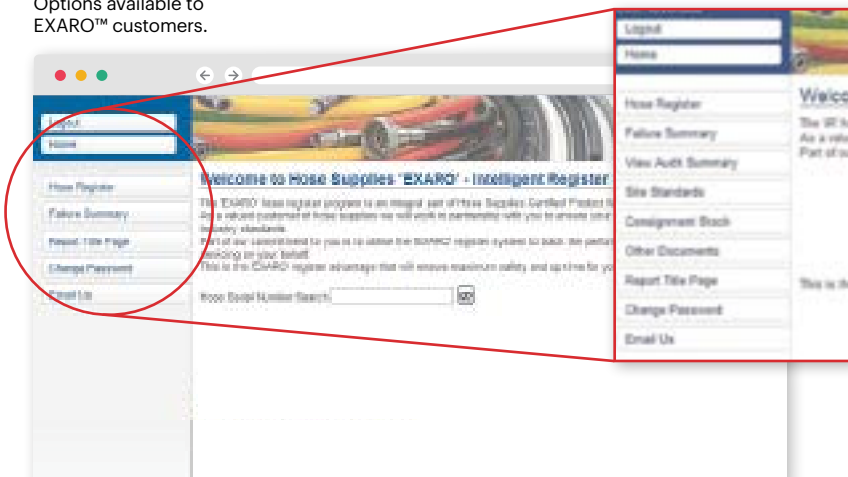

### Communication

- The live link puts you directly in touch with your regional workshop manager

### Safety

- Receive feedback on testing dates and repeat failures
- Improve OSH compliance

Options available to EXARO™ customers.

USING CPM  
& EXARO™**

## WHAT OUR CUSTOMERS ARE SAYING

**STEPHEN MCGREGOR**  
Operations Manager  
Mount Maunganui/Bluff  
Stolthaven

"The CPM EXARO™ programme has been implemented on several of our sites and has allowed us to rationalize our hose stocks, leading to significant savings. This system has also helped us to improve the reliability of our hoses and made the workplace safer. The information is available online and is easily and quickly analysed allowing us to make improvements based on fact. This is certainly a step-change for our industrial hoses and has made the job of managing them much easier"

**STEVE VAEGA**  
Bulk Liquid Transport Fleet Manager  
IXOM

"The IXOM transport fleet have been working in partnership with MFS for over a decade. MFS understand our business and take ownership of all hose compliance, and the EXARO™ register is yet another of their innovations that provide us with piece of mind and let our staff confidently focus on the task at hand – distributing bulk liquid chemicals."

**MARK ALLEN**  
Director  
MFI Engineering Ltd

"The MFS EXARO™ register is reliable and convenient. It allows us to track the maintenance history of every hose across our entire customer fleet, and as it is Internet based our customers also have immediate access to this information. Very smart, very easy to use"

Our products and services are delivered in line with a wide range of industry and internationally recognised quality standards:

**MiMOTION**

## WHAT WILL THIS SERVICE COST?

There is no annual subscription or online charge to view EXARO™, instead an administration fee is included at the time of testing.

Our customers quickly realise the benefits of EXARO™ and our CPM program, and genuine long-term partnerships develop between our companies.

**Can you afford not to be part of the Motion Fluid Solutions CPM Program?**

## INTERESTED... WHAT SHOULD YOU DO NOW?

Contact any of the MFS branches throughout NZ and we will arrange for a consultation to assess your requirements.

**We will come to your site and we will:**

- Inspect and test your hoses in accordance with industry specifications
- Provide immediate feedback to you on the status of your hoses
- Provide a unique numbering system for your hoses
- Upload your hose data to EXARO™
- Begin your continuous improvement cycle
